

VIVEK SUBRAMANIAM

SOFTWARE ENGINEER

PROFILE

I am a C++/Go developer for the most part, with extensive experience on Linux Middleware development, but more than that I am a Systems Engineer by profession, and thus I work to find technological solutions to business problems and am not constrained by things like languages or tools.

EDUCATION

● **Electrical Engineering, RNSIT, VTU**
AUG 2011 - JULY 2015

Graduated FCD (71%), won award for best final year project.

EXPERIENCE

Microsoft, Cloud platform, A4O

MARCH 2021 - PRESENT

Work on PaaS team for Unity Cloud, a cloud native virtual network function product.

Mostly worked on networking and observability agents - service mesh agents for load balancing, DNS and circuit breaking, opentelemetry agents for metrics and tracing, and client for redis database.
